

Ref. No: 1490
Date: 24.01.2024
Subject: Updates on AI Developments in AMR

REQUEST

Please provide information on the following:

1. Current AI Research and Initiatives:

- Any ongoing or completed projects related to AI in AMR.
- Details of AI-based tools, models, or technologies currently being developed or deployed in health systems, particularly with respect to AMR management.

2. Collaborations and Partnerships:

- Information about collaborations with universities, private sector organisations, or other bodies on AI projects in healthcare, specifically in AMR.

3. Funding and Resources:

- Details on funding allocated for AI in AMR and other health-related AI developments (including any relevant government funding programmes, grants, or research initiatives).

4. Progress Reports and Outcomes:

- Any available progress reports or evaluations on AI projects addressing AMR.
- Insights into the effectiveness or challenges encountered in implementing AI solutions in this area.

5. Plans for Future Developments:

- Any upcoming plans or projects related to AI in AMR or healthcare innovations that you can share.

RESPONSE

MWL response.

We do not have/never had any research studies related to AI in AMR, we do not have any in the pipeline either. This answer is the same for to both RDI Departments (at Whiston and Ormskirk).
