

Ref. No: 1611
Date: 18/03/24
Subject: Urinary Tract Infections in children

REQUEST

Please could you provide data into urine samples sent to the lab for suspected urinary tract infections between 1st Jan 2022 and 31st Dec 2024 for children aged 0-12years.

Please could you provide the data with the following headers:

1. Age
2. Gender
3. Organisms grown
4. Sensitivities

RESPONSE

Please see spreadsheet attached. The Trust has applied an exemption under Section 40 of the FOI Act to withhold the sharing of the age and gender of the patient. Combined with the timeline outlined in the question it could reasonably enable the patient to indirectly become identifiable and is therefore exempt from public release.
