

Ref. No: 1640
Date: 28th March 2025
Subject: Colposuspensions

REQUEST

1. The number of Colposuspensions conducted in your unit between 01 January 2020 and 31/12/2024.

Of these, please clarify how many were conducted: open, laparoscopically, and/or robotically.

2. How many of these cases have needed to go back to theatre for any procedure under the care of urogynaecology/gynaecology/urology since the initial operation? This should be in the first 30 days after the Colposuspension whether in the same admission or a re-admission.

2A. Please state, the suture material used in the index surgery (Colposuspension) whether permanent or absorbable, what procedures they then underwent in the readmission.

3. "Which suture material is routinely used to suture onto the iliopectineal ligament in open cases? Please state name of suture or N/A if this route of colposuspension is not performed."
4. "Which suture material is routinely used to suture onto the iliopectineal ligament in laparoscopic cases? Please state name of suture or N/A if this route of colposuspension is not performed."
5. "Which suture material is routinely used to suture onto the iliopectineal ligament in robotic cases? Please state name of suture or N/A if this route of colposuspension is not performed."

S&O site RESPONSE

1. The number of Colposuspensions conducted in your unit between 01 January 2020 and 31/12/2024.

Of these, please clarify how many were conducted: open, laparoscopically, and/or robotically.

Number of Colposuspension Procedures carried out at Legacy Southport & Ormskirk Hospital Trust 01/01/2020 - 31/12/2024	
Procedure Approach	Number of Colposuspensions Procedures
Laparoscopic	20
Open	12
Grand Total	32

2. How many of these cases have needed to go back to theatre for any procedure under the care of urogynaecology/gynaecology/urology since the initial operation? This should be in the first 30 days after the Colposuspension whether in the same admission or a re-admission.

S&O Sites – 0

3. "Which suture material is routinely used to suture onto the iliopectineal ligament in open cases? Please state name of suture or N/A if this route of colposuspension is not performed."

S&O sites, suture is prolene number zero. This is a non-absorbable suture or permanent suture

4. "Which suture material is routinely used to suture onto the iliopectineal ligament in laparoscopic cases? Please state name of suture or N/A if this route of colposuspension is not performed."

S&O sites, suture is prolene number zero. This is a non-absorbable suture or permanent suture

5. "Which suture material is routinely used to suture onto the iliopectineal ligament in robotic cases? Please state name of suture or N/A if this route of colposuspension is not performed."

N/A for S&O as do not do robotic cases.

StHK site RESPONSE

1. The number of Colposuspensions conducted in your unit between 01 January 2020 and 31/12/2024.

Of these, please clarify how many were conducted: open, laparoscopically, and/or robotically.

Number of Colposuspension Procedures carried out at Legacy StHK between 01/01/2020 - 31/12/2024	
Procedure Approach	Number of Colposuspensions Procedures
Open	15
Grand Total	15

2. How many of these cases have needed to go back to theatre for any procedure under the care of urogynaecology/gynaecology/urology since the initial operation? This should be in the first 30 days after the Colposuspension whether in the same admission or a re-admission.

StHK sites – 0

- a. Please state, the suture material used in the index surgery (Colposuspension) whether permanent or absorbable, what procedures they then underwent in the readmission.

StHK site, suture material is PDS (absorbable). No readmission

3. "Which suture material is routinely used to suture onto the iliopectineal ligament in open cases? Please state name of suture or N/A if this route of colposuspension is not performed."

StHK sites, suture is PDS (absorbable)

4. "Which suture material is routinely used to suture onto the iliopectineal ligament in laparoscopic cases? Please state name of suture or N/A if this route of colposuspension is not performed."

StHK sites, suture is PDS (absorbable)

5. "Which suture material is routinely used to suture onto the iliopectineal ligament in robotic cases? Please state name of suture or N/A if this route of colposuspension is not performed."

N/A for StHK as do not do robotic cases.
