

Ref. No:	2119
Date:	16/10/25
Subject:	Volume usage of wipe systems/sets for used on non-lumened instruments which cannot be decontaminated

REQUEST

Please provide the following information for the 12 month period 1st September 2024 – 31st August 2025

1. Volume usage of wipe systems/sets for used on non-lumened instruments which cannot be decontaminated in an AER automated reprocessing machine eg ultrasound, TOE/TEE, TVUS, TRUS probes (an example of such products is Tristel Trio Wipes System)
2. Please list the relevant departments where these are used. Eg Gynaecology imaging, outpatients.

The combined volume / spend from all sites would be fine or it can be divided up for individual sites, whichever is easiest .

RESPONSE

We can only provide information on wipes purchased and not why the wipes where used.
