

Ref. No: 2262
Date: 06/01/26
Subject: Medical imaging equipment

REQUEST

Can you please complete the fields below with what you currently hold?

A list of the current medical imaging equipment held by the Trust across all hospital sites, providing the following information:

Q1: What is the contract value for each imaging modality requested below:

- a) Computed Tomography (CT)
- b) Magnetic Resonance Imaging (MRI)
- c) Ultrasound
- d) Fluoroscopy
- e) Mammography
- f) Nuclear
- g) Mobile X-ray
- h) Static X-ray

Q2: A list of the current modalities held by the Trust across all hospital sites for each of the following:

- a) Supplier name
- b) Product name
- c) Contract start date
- d) Contract expiry date
- e) Number of devices

f) Age of product

Example Response: 3 x Siemens Acuson SC2000, Initial cost £ 29,000,
Contract start date 10/02/2022 Contract end date 10/02/2026, 6 years old

Q3: What percentage of your imaging equipment has an element of Artificial Intelligence?

Definitions:

1. Computed Tomography (CT) - is a medical imaging technique that uses computer-processed combinations of multiple X-ray measurements taken from different angles to produce images of a body, allowing the user to see inside the body without cutting. They are used within Medical Physics and Radiology departments.
2. Magnetic Resonance Imaging (MRI) - is a medical imaging technique used in radiology to form pictures of the anatomy and the physiological processes of the body. They are used in Medical Physics and Radiology departments.
3. Ultrasound – is an imaging method that uses high-frequency sound waves to produce images of structures within the body. Ultrasound machines are used in various departments such as Radiology, Renal, Urology, Vascular, Clinical Science and Medical Physics.
4. Fluoroscopy - is an imaging technique that uses X-rays to obtain real-time moving images of the interior of an object. These products are used in Radiology departments.
5. Mammography – is a screening system used to detect and diagnose breast cancer by taking an X-ray of the breast. These products are used by Radiology and Breast Imaging professionals.
6. Nuclear - is a specialised area of radiology that uses very small amounts of radioactive materials, or radiopharmaceuticals, to examine organ function and structure. These products are used in Medical Physics and Radiology departments.
7. Mobile X-ray - these units are used for radiographic imaging of patients who cannot be moved to the radiology department and who are in areas, such as intensive and critical care units or operating and emergency rooms, that lack standard, fixed radiographic equipment. Medical applications can include general radiography and orthopaedic, paediatric, skeletal, and abdominal imaging. They are usually used by Surgeons and Medical Physics and Radiology professionals.

8. Static X-ray - is used for taking standard x-rays. These products are used in Medical Physics and Radiology departments.

RESPONSE

Regarding information about Trust contracts generally,

Information which is publicly available

The Trust publishes contract information in accordance with applicable procurement legislation. This includes, but is not limited to, Public Contracts Regulations 2015; Procurement Act 2023 and Health Care Services (Provider Selection Regime) Regulations 2023. Contract information published in accordance with requirements of legislation includes contract details, supplier name, value, term, procurement route etc.

Publication locations include Official Journal of the European Union (<https://ted.europa.eu/en/>) for some older notices and Contracts Finder (<https://www.gov.uk/contracts-finder>) Find a Tender Service (<https://www.find-tender.service.gov.uk/Search>). Procurement pipeline information will be published in accordance with legislation.

Additionally, the Trust goes beyond the legal requirements and publishes extracts of its contracts register, periodically, on its public website. (<https://sthk.merseywestlancs.nhs.uk/our-services?service=36>)

Publication information includes, but is not limited to, contract descriptions, start and end dates, extension options, procurement routes, supplier details and contract values.

Therefore, the majority of detail in your request is currently publicly available. This means that section 21 of Freedom of Information Act applies.

Alternatively, the Trust updates information as and when more information becomes available, including new contracts being let.

Information which will be made publicly available

Alternatively, information will be made publicly available as more contracts are advertised and awarded on Find a Tender Service and our contracts register on the website is updated. Therefore, section 22 of the Freedom of Information Act apply
