

Ref. No: FOI2584
Date: 26/05/2026
Subject: EUCAST Antimicrobial Susceptibility Testing

REQUEST & RESPONSE

1. What version of the EUCAST breakpoint tables is currently in use within your microbiology department for antimicrobial susceptibility testing?

V16.0

2. What is your process for updating to new EUCAST versions?

Once updated versions are released, these are reviewed by clinical scientists for possible changes required. These are then brought to a Microbiology Management Meeting and reviewed by medics and management and actions/updates agreed.

3. If you are not currently using the latest version (v16.0), what is the reason for this?

N/A
