

Ref. No: 2595
Date: 02/06/26
Subject: Clinical Indication - Re: Cardiac MRI (CMR) scans -
November 2021

REQUEST

The last request response sent was **FOI2567**

The request was; " With specific regard ONLY for November 2021, where there were 27 Cardiac MRI referrals from MWL to external providers Please specify how many of the documented 27 referrals were made with a primary clinical indication of Suspected Myocarditis (ICD-10 code I40)."

Our response was <5

The requester would like clarity on the wording 'specify'

Does your response mean 4, 3, 2, 1, or 0, or does it mean "we don't know"? I don't mean to seem glib (as I realise this must sound), but the number must certainly be documented. Correct me if I'm wrong, but I AM following the prescribed route to request this publicly available information.

RESPONSE

<5

Due to the low number of patients which is less than five for the period, the Trust is withholding the actual number under section 40 – Personal Information of the Freedom of Information Act due to likelihood of identification
