

Ref. No: 2659
Date: 01/07/26
Subject: Ethics and device procurement

REQUEST & RESPONSE

1. Please provide the date when your medical device (as defined by MHRA, i.e. also including relevant software) procurement policy (or policies, if you e.g. have a separate one for medical software) was/were last updated.

The Trust does not have a standalone policy for procurement of medical devices. This is covered by other policies, including, but not limited to Medical Devices Policy, Procurement Strategy and Procurement Manual

2. Please state whether the policy (mentioned in point 1 above) requires that a clinical ethicist should be consulted during purchase decisions (if a clinical ethicist is only needs to be consulted under certain conditions, please list these). A clinical ethicists is defined as a member of your clinical ethics committee (under whatever name it operates in your organisation, but this does not include research ethics committees) or an academic with a dedicated post in ethics or a permanent staff members explicitly employed to provide clinical ethics support.

The Trust does not have a standalone policy for procurement of medical devices. This is covered by other policies, including, but not limited to Medical Devices Policy, Procurement Strategy and Procurement Manual

3. If the policy requires ethical issues to be considered during such devise purchase decisions, but not via input of a clinical ethicist as defined above, please state the mechanisms in place for fulfilling that requirement.

The Trust does not have a standalone policy for procurement of medical devices. This is covered by other policies, including, but not limited to Medical Devices Policy, Procurement Strategy and Procurement Manual

4. Please state whether you had clinical ethicist (as defined above) involvement in the purchase of any clinical artificial intelligence applications irrespective of whether this is mandated by your policy.

The Trust does not have a standalone policy for procurement of medical devices. This is covered by other policies, including, but not limited to Medical Devices Policy, Procurement Strategy and Procurement Manual
